MEMORANDUM

Date: November 3, 2017
To: The California State University Channel Islands Site Authority Board
From: The University Glen Community Advisory Group
RE: EO 1108 – Policy on Systemwide Smoke and Tobacco Free Environment

Background:
Pursuant to Executive Order 1108, beginning August 23, 2017, CSU Channel Islands became a smoke and tobacco free campus.

The Smoke & Tobacco-Free policy pertains to University-owned undeveloped or leased property. Given the close proximity of Site Authority land and its purpose of supporting the campus, notification was provided to residents of University Glen and other stakeholders that the policy had taken effect in the academic campus. Feedback was solicited from residents of the community and other stakeholders by way of a survey, an open forum meeting, and discussions during the University Glen Community Advisory Group and Homeowner’s Advisory Group meetings.

The majority of the respondents, and the University Glen Community Advisory Group, supports the recommendation that smoking should be permitted inside residential units and in privately owned outdoor areas (patios), but prohibited in common areas of Site Authority property.

Submitted on behalf of the University Glen Community Advisory Group,

[Signature]
